**Invitee response rate** 29.8%

The demand for the Athletics Fitness Centre has far exceeded the current space of 11,000 sq. ft. Currently, Carleton students' fee is one of the lowest in the province (more than 30% below the provincial average). Due to this increased demand for usage of the Fitness Centre, Carleton Athletics is proposing an expanded two floor facility (total expansion to 32,000 sq. ft.) which will feature: brand-new cardio, weight, and fitness equipment; four new multipurpose rooms (for fitness, spinning, and yoga classes); women-only area and the inclusion of all CUFIT classes.

Do you support the creation of a \$39 per term fee, indexed to the Consumer Price Index, to fund a 21,000 sq. ft. Fitness Centre expansion? This fee would only take effect once the new Fitness Center is built and open to students.
